Lee Min-ho

PERFORMANCE

Performing arts, type of forum for interaction between artists and fans, is not only one of the most important parts of Korean wave contents, but also is a major industry that we drive.

We organize concerts and fan meetings through a stable network with other entertainment companies and we set aside a separate space to host a festival with global fans.

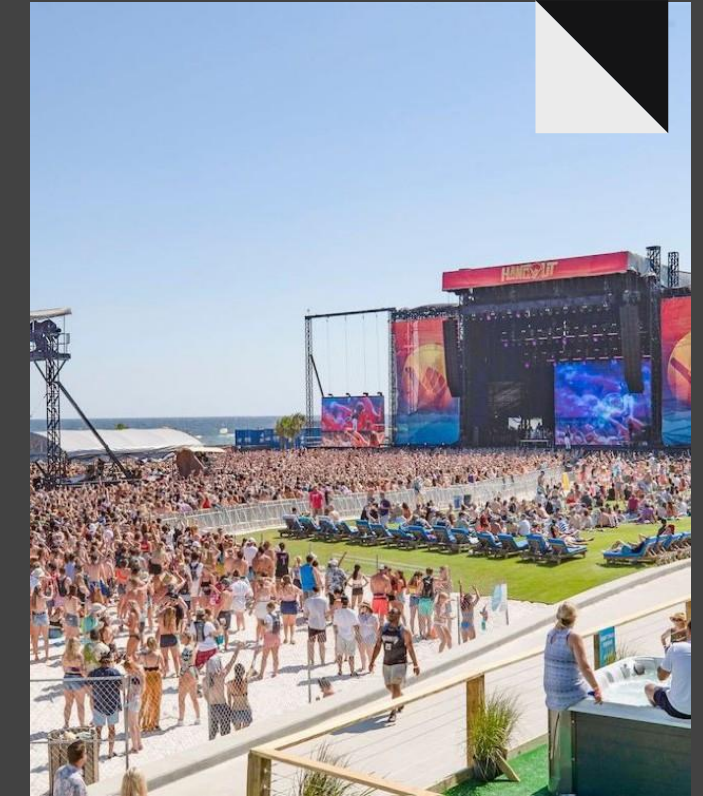

K POP CONCERT

Fans will feel stronger sense of bonding to artists they've only been able to meet online, as they get to see them live, face-to-face.

ARTIST FANMEETING

Place for K-stars and fans to meet, communicate, and interact, reducing the distance between them and creating positive interactions.

PARTY&FESTIVAL

K WAVE PARK, planned to built in Jeju Islan, will host fascinating beach parties and unique festivals with global fans.

DRAMA

The form of drama viewing through Netflix and other OTT platforms are experiencing the greatest boom as it started to have stable production structure like movies and enabling production companies to focus on production with good planning and scripts without big financial risks. As a result, it's at the peak of its golden chance that is called virtuous cycle structured industry, which generates good contents.

K WAVE also aims to create new and differentiated drama contents that can entertain and motivate people around the world.

Create Global Contents

Plan items that suit the needs of global OTT platforms
Produce seasonal dramas in variety of genres
Discover talented new writes and creators

Global IP Business

Conducting additional business through animated music and story of the drama being produced

NETFLIX

Apple tv+

prime

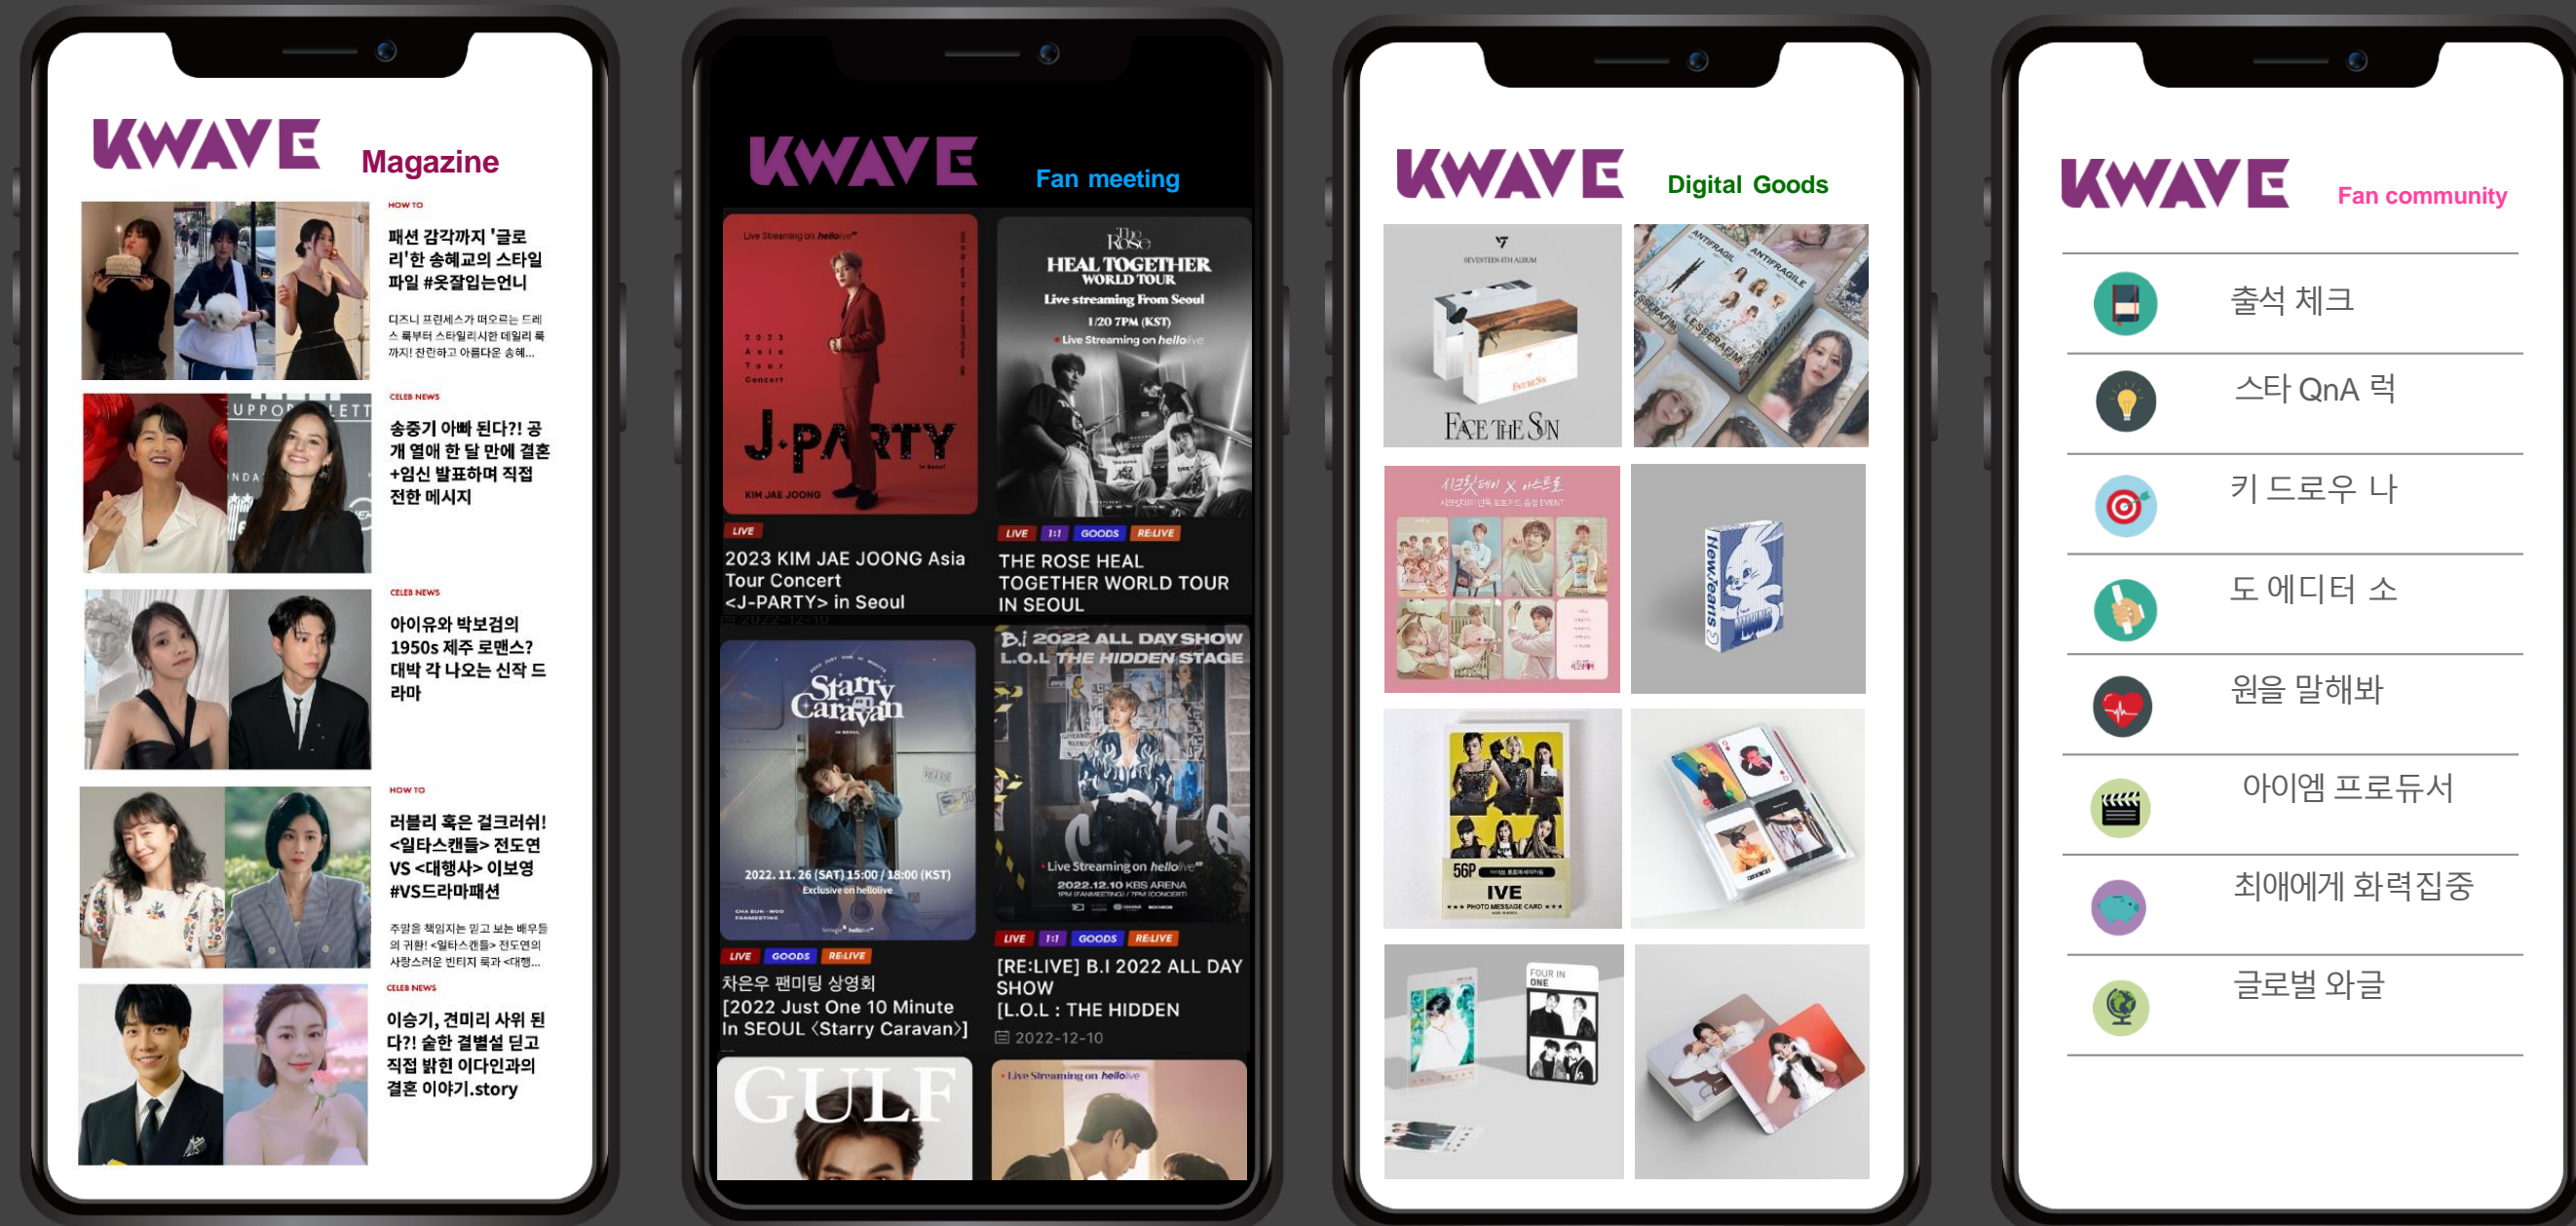

JTBC

wavve

tvN

Global Fandom Platform

The K.WAVE platform, which will provide diverse services such as online webzines, live broadcasting services for fan meetings, digital merchandise ships, and fan communities, etc., offers the convenience of active interactions between artists and global fans regardless of location to connect them, and also offers participating type of content that allows users to make special experiences by interacting with their favorite artists.
